HISTORICAL DEVELOPMENT: GENESIS OF THE COLLEGE

The Bagalkot region and the adjoining districts of North Karnataka possess immense potential for horticultural development owing to their diverse agro-climatic conditions, fertile soils, and extensive cultivation of fruit, vegetable, flower, plantation, spice, and medicinal crops. Despite being one of the major horticultural production belts of Karnataka, the region required an additional institution dedicated to quality horticultural education, research, innovation, and extension to meet the growing demand for skilled human resources and location-specific technologies. With the rapid expansion of the horticulture sector and the increasing aspirations of rural youth for professional education in horticultural sciences, the need for a modern institution committed to academic excellence and farmer-oriented research became increasingly evident. Recognizing this necessity, S. R. Patil Education Foundation established S. R. Patil College of Horticulture and Research Institute, Badagandi in 2026. The college is affiliated with the University of Horticultural Sciences (UHS), Bagalkot, and has been established with the vision of producing competent horticulture professionals, promoting innovative research, facilitating technology transfer, and contributing to the sustainable development of the horticulture sector. The institution is committed to providing high-quality education supported by state-of-the-art infrastructure, well-equipped laboratories, experiential learning facilities, and strong industry-farmer linkages. Through excellence in teaching, research, extension, and entrepreneurship, the college aims to emerge as a centre of excellence in horticultural education, serving the farming community and contributing significantly to the agricultural and economic development of Karnataka and the nation.

VISION

To be a premier institution of excellence in horticultural education, research, innovation, and extension, producing globally competent professionals who contribute to sustainable agriculture, food and nutritional security, environmental conservation, and rural prosperity.

MISSION

- To provide quality horticultural education through modern teaching methodologies, experiential learning, and industry-oriented curriculum.
- To promote innovative research that addresses regional, national, and global challenges in horticulture.
- To develop skilled, ethical, and socially responsible graduates capable of serving farming communities and agri-industries.
- To strengthen farmer outreach through effective extension programmes, technology transfer, and community engagement.
- To encourage entrepreneurship, start-up culture, and value addition in horticulture for enhanced livelihood opportunities.
- To integrate digital technologies, precision horticulture, climate-smart practices, and sustainable resource management into education and research.
- To foster collaborations with industries, research organizations, government agencies, and international institutions for academic excellence.

OBJECTIVES

- Horticulture is essential for providing nutritional security to people and to increase the profitability to farmers through the development of appropriate technologies and manpower.
- To develop need-based manpower and technologies to resolve the problems confronting horticulture and enable the horticultural farmers economically sustainable and to make horticulture as the most remunerative enterprise for them.
- To develop technically sound manpower to cater to the present needs of the horticulture and allied industries through B.Sc. (Hons.) Horticulture degree programmes.
- To develop improved technologies for various horticultural crops with respect to production, protection, post-harvest management and processing, marketing, information technology, etc.
- To develop technologies for horticultural crops which are eco-friendly.
- To facilitate transfer of technology to the farming community through extension systems like media, trainings, demonstration, consultancy etc.
- To supply quality seed and planting material.
- To develop linkages with the state/central/international institutions, NGOs, orchardists, farmers and industrialists for ensuring economic and ecological security in the state.

ACADEMIC FACILITIES

The campus is having all the infrastructural facilities includes college, library, play-ground, hostels, bank, dispensary, canteen, xerox and stationary shop etc. Further, college has been divided into seven blocks allotted to different departments. Each department is having smart classrooms and well-equipped laboratories.

LIBRARY FACILITIES

The College Library is having seating capacity of 150 and 20 computers with internet facilities.

Stock Arrangements

Open Access System for accessing library collection, classified according to Dewey Decimal Classification (DDC) arranged in APUPA pattern.

Theses, back volumes and reference books stacked separately.

There is a separate collection for competitive exam books.

Library has the collection of e-books from different publishers.

LABORATORY FACILITIES

The College has well equipped specialized laboratory / research units with sophisticated equipments to carry out both fundamental and applied research in the area of horticultural sciences. The College has a central instrumentation room, which is accessible to both faculty and students. Each department has adequate equipments / instruments, to carryout UG practical classes. Sophisticated instrumentation facilities developed at the college have been the major strengths to carry out advanced research in several areas and provide options for students to get adequate exposure in recent modern biology techniques.

ADMISSION PROCESS

The students admission policies for graduate are clearly defined in the Academic Information and Regulations of the University, taking into consideration the norms prescribed by the Government of Karnataka and ICAR from time to time. The minimum eligibility of education qualification is pass in II PUC (10+2) with subjects Physics, Chemistry, Mathematics and Biology (PCMB).

Sl No	Admission Authority	Admission Criteria	Admission Pattern	Intake capacity
1	KEA/CET	Admissions to II PUC (PCMB) passed students through CET entrance test.	50% in PCMB + 50% in K-CET	Reservation of Seats as per State Government order
		Admissions to II PUC (PCMB) passed students who are children of Agriculturist/Agriculture labor, through practical test.	50% in PT +25% in PCMB + 25% in K-CET	Horizontal reservation (40%)
2	Management Quota	Admissions to II PUC (PCMB) passed students through CET entrance test.	Through Counseling to the II PUC Science completed students with PCMB/PCB.	15% over and above total intake through KEA.

EXAMINATION AND EVALUATION PROCESS FOR THE GRADUATE PROGRAMME IS PER 5TH DEAN'S COMMITTEE

Evaluation of students' performance is made separately for each course. The evaluation of the student in each course is referred as grading and will be measured by the quality of the student's performance in that course by assigning grade points. The Cumulative Grade Point Average (CGPA)/Overall Grade Point Average (OGPA) is the basis to determine whether or not a student meets the academic requirements during the course of study for award of degree for which student has been admitted. Each course carries a maximum of 100 marks for the purpose of grading (50 marks for internal exam and 50 marks for External theory exam). In evaluating the student's performance, the following points is considered.

Attendance: A minimum of 80 percent attendance is compulsory. A student fulfilling above and over 80 percent of the attendance marks are awarded proportionately out of the 5 marks set apart for the remaining 20 per cent attendance. In special cases, on medical grounds Dean has the power to condone 5.0 percent of attendance if the students attendance is less than 80 percent.

Class performance: It includes practical records, assignments and examinations.

Midterm examination: The entire portion from the first class till the date of examination is covered. The duration is one hour and it will be for 25 marks.

Final Theory External Examination: The entire course content is covered for the examination. The duration of the final theory examination will not be less than two hours and it will be for 50 marks.

EXPERIENTIAL LEARNING PROGRAMMES

Experiential learning is a concept where learners and teachers are involved to increase knowledge, develop skill and entrepreneurship. It is an approach for problem solving, accounting, quality control, marketing and resolving conflicts etc. The programme has end to end approach. Carefully calibrated activities move participants to explore and discover their own potential and in process, provide analytical skills and business acumen. Both activities and facilitation play a critical role in enhancing team performance. ELP thus, provides the students an excellent opportunity to develop analytical and entrepreneurial skills, and knowledge through meaningful hands on experience and confidence in their ability to design and execute project work.

RURAL HORTICULTURAL WORK EXPERIENCE

Rural Horticultural Work Experience (RHWE) is an important programme activity introduced to have rural experience among the students to build competence, confidence and expertise and in this programme, the students stay in villages (each attached to a farmer) and work together with the farmers to closely study their problems, needs and learn to live in rural areas. RHWE programme covers the study of rural situation, village settlement pattern, demography, climate, land utilization pattern, resources inventory, infrastructural facilities, cropping pattern, cropping systems, extent of adoption of latest technologies, constraints, social participation, extension contact, etc. It also provides significant hand on experience to gain knowledge and diagnostic skills.

CULTURAL CENTER

College has cultural and literary center to empower students to explore, celebrate, and educate the campus community. One faculty of the cadre of Assistant Professor is in charge of this cultural centre. The college offers an inclusive and reflective space, multicultural programming, and support services that encourage positive interaction, academic persistence and growth among students. To harness the talents of the students of College, cultural activities are conducted regularly

NSS/NCC/RVC UNITS

The college nominates one teacher per 100 students as NSS Programme Officer for a term of two years. At college there are two units working. The NSS is offered as a non load compulsory course during the second year of degree programme. Apart from this, the students also participate in NSS National level activities and special camps organized at college level as well as state and national level.

GREEN GRADUATION

Green graduation would be implemented in the college, wherein each student has to plant one sapling and nurture the plant during the four years degree programme.

EMPLOYABILITY

The ultimate goal of any student after graduation/post graduation is either engage in self-employment as entrepreneur or get employed in private or public sector industries or organizations. Imparting skills to learners based on above specific job needs is mandatory of any college/institution. Graduate students right from the beginning will be taught theoretically and practical skills on different areas like crop production, crop protection, postharvest management - value addition, business management, entrepreneurial development, interpersonal relationships, effective communications skills etc. till the end of the degree programme. Subject courses are designed in accordance with 5th Deans' committee report giving more importance to practical skills in all areas of horticulture.

SCHOLARSHIPS/ ASSISTANTSHIPS

The admitted students can avail scholarships by State and Central Governments, the merit scholarships, general scholarships and students aid fund, etc are available.

EXPOSURE VISITS

As per the course curriculum, the students will undergo study tour (All India Industrial Tour) to get exposed them to the various academic and research institutes multinational food companies, start up entrepreneurs, progressive farmers, beside this, the exposed visits are also arranged as per the requirements of various courses offered during each semester.

HOSTELS

The S. R. Patil College of Horticulture and Research Institute, Badagandi has total two number of hostels. Both the hostels are equipped with wi-fi facility, solar water heaters, CCTV surveillance cameras, steam cooking facilities, R.O. water purifying system along with uninterrupted power supply system (50KV Generators), reading room, TV hall and parking shed for vehicles. All the hostel rooms have been equipped with cots, tables, cup boards and chairs for majority of the students. Each hostel has been provided with neat and tidy dining hall.
